

Guitar Heavyweights—Phil Collen and the DT555

Phil Collen of Def Leppard embodies the awesome power and blazing intensity of Heavy Metal. From searing solos to the crunch of power chords, Phil needs a guitar that can deliver night after night and stand up to the punishment of a gruelling world-wide tour. The Ibanez DT555 guitar meets the challenge head-on with features that are built to take it no matter how much you abuse it. Three sizzling V2 pickups give this Destroyer a distinctive voice to get your message across. The three piece set-in maple neck with rosewood fingerboard and lightweight birch on basswood body puts total control in your hands. Finished in jet black with gold hardware, the DT555 is ready to take command.

Also available in the Destroyer family, the DT155 carries on the hard-rocking tradition at a modest price. This feature-packed guitar delivers outstanding performance with Super 70 pickups and Smooth TunerII machine heads.

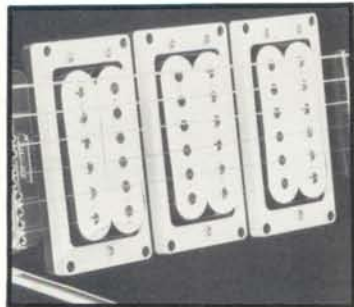

Be there and feel the power as Phil Collen and Ibanez rock the world on Def Leppard's upcoming new album and tour.

HEAVY METAL MACHINERY

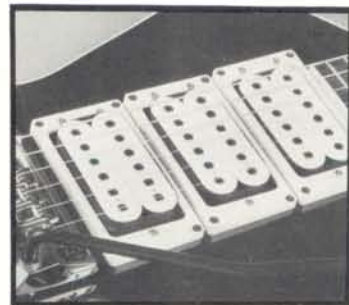

DT155 BK

Super 70 Pickups

For a warm, full sound that cuts through, Ibanez Super 70 pickups are unsurpassed. Ceramic magnet construction boosts output while keeping the mid-frequencies crisp and well defined.

DT555 BK

V2 Pickups

Enhanced output and powerful sustain are just two of the features of these hot pickups. The fat humbucking sound is refined with increased high end edge and warm lows. Coupled with the 3-way selector switch, the unique 3 pickup system provides a wide range of tonal colors.

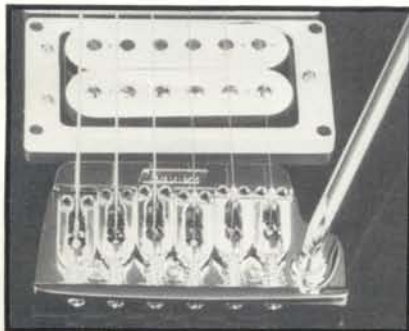

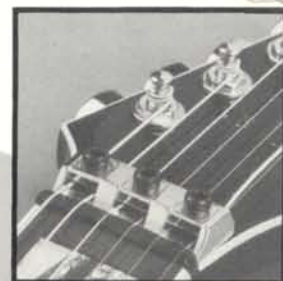

Tek-Grip Control Knobs

This original knob design features high-tech styling for the 80's. You can control it with a light smooth touch.

Heavy-Duty non-slip finish guarantees the stability of operation.

Top Lock II

The new Top Lok II string clamp and graphite nut keep the DT555 in tune no matter how hard you play. Made of top quality hardened steel, the Top Lok II clamps the strings securely without damaging them. The graphite nut eliminates binding and grabbing as the strings return to pitch.

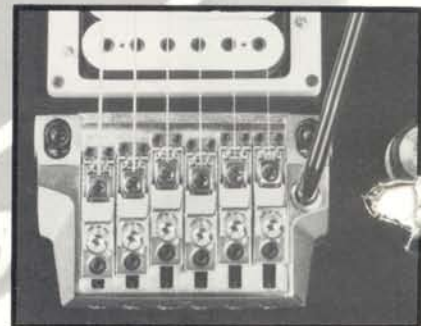

Power Rocker Tremolo

The free-floating design of the Power Rocker Tremolo eliminates the metal to metal wear problems of more conventional Tremolo systems. Simplified string loading and a snap-in arm contribute to the easy operation of the Power Rocker Tremolo.

Pro Rock'R Tremolo

This precision system takes over where others leave off. From the most aggressive dive-bomber effects to subtle vibrato shadings, the Pro Rock'R performs flawlessly. The extra smooth action, coupled with our fine tuners and snap-in arm makes the Pro Rock'R one of the finest tremolo systems available.
